I am writing to urge the rejection of Petition 04-160. The programming I receive from XM satellite radio is not available from broadcast stations. The majority of over the air stations currently play 6 to 8 minutes of continuous commercials before playing 10 - 12 minutes of songs. This is particularly acute during drive time. Additionally, the over the air stations play the same songs over and over to the point that your watch can be set by when they come on. I do not listen to traffic on a regular basis and need it only in short bursts. XM permits me to find traffic news on demand, not wait the 10 minutes or more from over the air stations when the information provided is often old by the time it is received and the wait through commercials is excessive. If over the air stations have a problem with satellite radio, it is due to their own decisions and they should not dictate to others what is available to them. I urge you to reject 04-160.
